HOW HAS CROSS-BORDER TRADE BEHAVIOUR  
CHANGED DURING THE COVID-19 PANDEMIC?

*DECEMBER 2020*

Sauti.

## SAUTI TRADE INSIGHTS

DECEMBER 2020

---

COVID-19 has imposed extreme challenges for East Africa's micro and small enterprise traders, many of which rely on ease of cross-border movement for their profits. Others depend on gathering at local marketplaces where maintaining social distance is challenging. While immediate national health policies have focused on limiting the health and human costs of COVID-19, East Africa's traders have been forced to make dramatic changes and adapt their business and market behaviour to the new realities of the global pandemic.

In all this, understanding the economic shifts in East Africa's small-scale trade sector—one of the most important factors for poverty alleviation and women's economic empowerment—will be paramount to designing policy and interventions that sufficiently addresses the economic toll of COVID-19.

This report leverages the unique analytical perspective from Sauti East Africa to document traders' changes in business behaviour in response to the COVID-19 pandemic. For this report, we present behavioural insights from our mobile-based market information platforms in two East African countries: Kenya and Rwanda. The market and trade information requested by users, joined with supplementary demographic user data, gives us unprecedented opportunities to present near real-time findings on business behaviour, such as top traded commodities and market destinations. Further, the longitudinal nature of the data allows us to identify significant shifts in business behaviour, including before and after the onset of COVID-19 in Q1 and Q2 2020.

This report presents key findings on the economic impacts of COVID-19 on traders. Most significantly, [we identify a regional decline](#) in cross-border market destinations and an increase in local market destinations, likely a reflection of national restrictions on cross-border movements.

In Kenya, we show that [female traders have been hit harder](#) by the shocks of the pandemic as compared to male traders. Additionally, while the prevalence of traders' trading in maize cereals is down across the board, the [increase in women trading in fruits](#) suggests the presence of an economic lifeline with significant gendered considerations.

Ultimately, our objective is to shed light on this often hard-to-sample population. Moreover, we intend to highlight the differentiated impacts of COVID-19 between harder-to-sample demographics. It is these traders, most impacted by the shock of COVID-19, which will require the greatest support to recover from the effects of this global pandemic.

## SUMMARY OF FINDINGS

### Q1/Q2 2020 AT A GLANCE

#### MOST POPULAR COMMODITIES IN EAST AFRICA, BY CATEGORIES Q1/Q2 2020

The most popular commodity categories of both Q1 and Q2 of 2020 are beans (avg. 29%), followed by maize cereals (avg. 23%). Beans were traded 6 percentage points (pp) less in Q1 than in Q2, experiencing the most notable drop in trade between the quarters. Additionally, rice cereals, peas, and maize cereals were potentially also affected by

trade changes in Q2, with more than a 2pp reduction in trade between the quarters.

The commodity categories with the greatest positive change in trade levels from Q1 to Q2 were vegetables and animal products. These were traded 6pp and 4pp more in Q2, respectively.

## MOST POPULAR TRADE DESTINATIONS FOR KENYAN TRADERS

The majority of Kenyan traders have kept their business within the borders of Kenya during Q1/Q2 2020, with the next most popular trade destination being in Uganda. However, there are 24pp less Kenyan traders buying and selling in Uganda compared to the same time period in 2019. Furthermore, in contrast to the data from this year, in Q1/Q2 2019 Kenyan traders were also trading in the DR Congo and in South Sudan.

# IMPACT OF COVID-19 PANDEMIC

## CROSS-BORDER TRADE MOVEMENT

## TRADE DESTINATIONS FOR KENYAN TRADERS IN Q1/Q2 2020

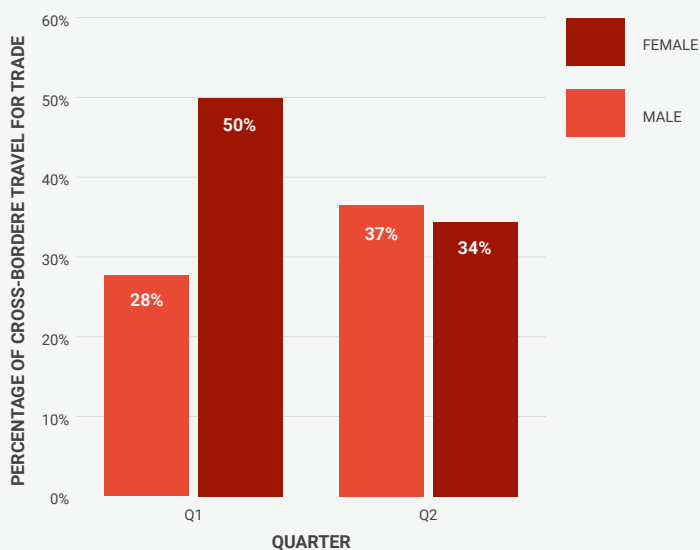

The most popular market destination for Kenyan traders remained within the Kenyan borders in Q1/Q2 2020. However, in May of Q2, these trade levels dropped briefly by 15pp. Additionally, Tanzania, Rwanda, Malawi, and Burundi experienced less trade from Kenyan traders from Q1 to Q2. This is

reiterated in the second bar chart suggesting a significant decrease in cross-border trading from Kenya in 2020 Q2 in comparison to previous years. Women traders, specifically, reduced their cross-border trading by 16pp from Q1 to Q2.

## CROSS-BORDER TRADING FROM KENYA IN Q2 OF 2018, 2019 &amp; 2020

## CROSS-BORDER TRADING FROM KENYA IN Q1/Q2 OF 2020

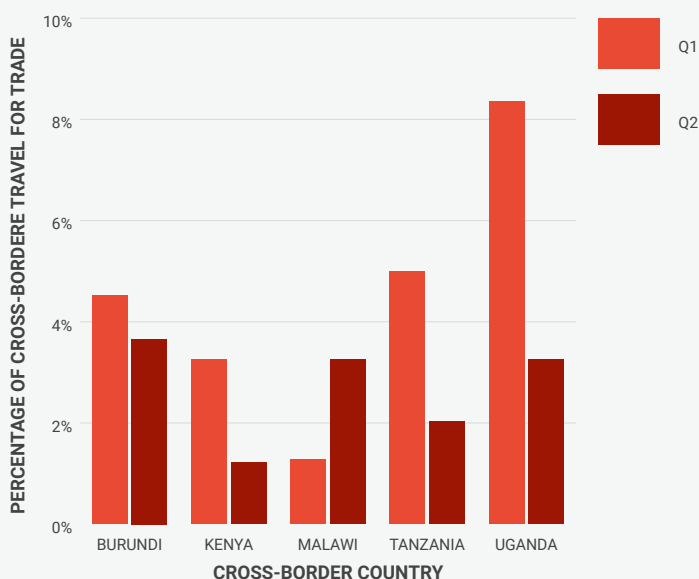

## TRADE DESTINATIONS FOR RWANDAN TRADERS IN Q1/Q2 2020

The most popular market destination for Rwandan traders from January to June 2020 were located in Rwanda. Trade destinations in Rwanda increased from 76% to 91% for traders from January to June. Cross-border

trading was low throughout Q1 and Q2, with the January having the highest percentage of cross-border trade at 24% of total activities.

## CROSS-BORDER TRADING FROM RWANDA IN Q1/Q2 OF 2020

In Q1 2020, the most popular cross-border trade destination was Uganda (8%). In Q2, however, Rwandan trade in Uganda fell by 5pp. Similarly, Burundi (-1pp), Kenya (-2pp), and Tanzania (-3pp) also experienced a decrease in Rwandan traders from Q1 to Q2.

The only cross-border country with an increase in Rwandan traders from Q1 to Q2 was Malawi (+2pp).

## MARKET ACTIVITIES OF KENYAN TRADERS IN Q1/Q2 2020

Nairobi had the highest Kenyan trader activity from January to June 2020, comprising 50% of all trade activity over this period. While Kenyan trade activity in Nairobi had the highest growth from Q1 to Q2 (+15pp), trade in the Dar es Salaam (-3pp), Busia (-9pp), and Arusha (-9pp) decreased from Q1 to Q2.

For Rwandan traders, market activity was more volatile in Q1/Q2 2020. Activity in Busasamana increased by 2pp from Q1 to Q2. Butare comprised 29% of all trade activity over this time. Additionally, trade activities at Base (-5pp), Kampala (-3pp), and Kabale (-3pp) decreased from Q1 to Q2.

## MARKET ACTIVITIES OF RWANDAN TRADERS IN Q1/Q2 2020

**IMPACT OF COVID-19 PANDEMIC**

**TRADED COMMODITIES**

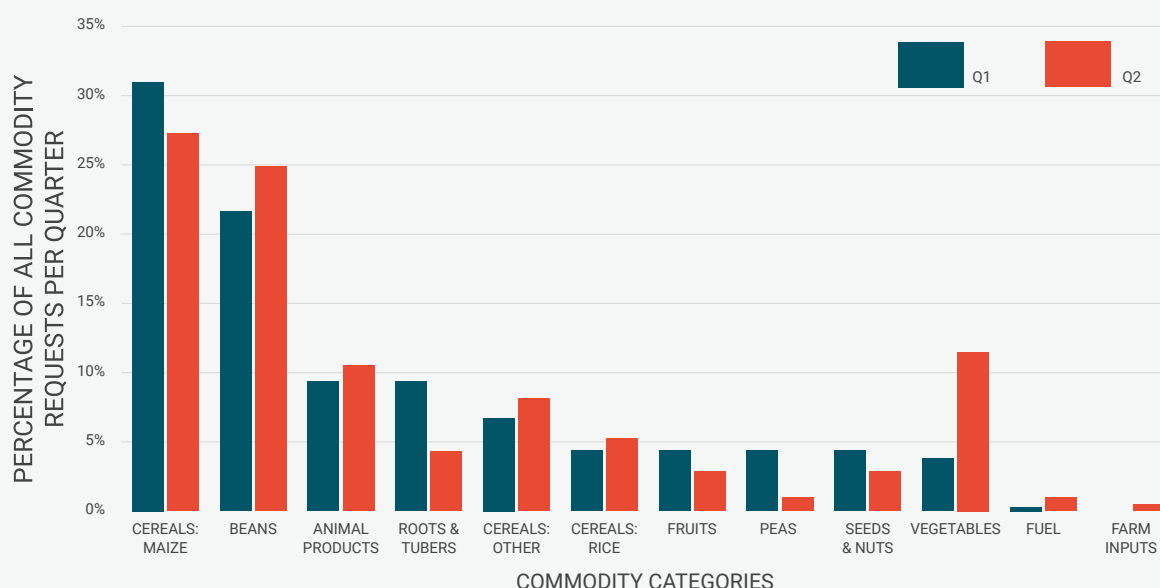

## COMMODITY CATEGORIES REQUESTED BY WOMEN TRADERS IN 2020

For women traders in East Africa, the most popular commodity categories were beans (27%) and maize cereals (25%) in Q1. From Q1 to Q2, trade in beans (-9pp) and maize cereals (-6pp) dropped substantially, while trade in fruits increased from 16% to 27%.

Maize cereals (31%) and beans (22%) were also the top traded commodities for male traders in Q1. Unlike the data for the women traders, trade in beans increased by 4pp from Q1 to Q2. Additionally, trade in vegetables increased by 7pp from Q1 (4%) to Q2 (11%).

## COMMODITY CATEGORIES REQUESTED BY MALE TRADERS IN 2020

## CHANGE OF COMMODITIES REQUESTED IN KENYA IN 2020

The most popular commodity for Kenyan traders over Q1/Q2 2020 was Dry Maize (avg. 23%), peaking in May at 30%. Excluding eggs (+3pp), all other top commodities were traded less in Q2 than in Q1. Trade in Green Beans had the greatest negative change

(-17pp). The most popular commodity for Rwandan traders was Black Beans (avg. 19%), peaking in Jun at 38%. Soya Beans (-19pp) and Mixed Beans (-6pp) were the only commodities with a negative change in trade from Q1 to Q2.

## CHANGE OF COMMODITIES REQUESTED IN RWANDA IN 2020
